SINE SYSTEMS

RADSOK®

By combining locally-based Program Management & Engineering, along with the associated cost advantages derived from manufacturing in our low-cost production centers in North America and Asia, our Team will work with you to design the most cost-efficient and reliable interconnect system available.

Benefiting greatly from the resources, technologies and experience of the second largest connector manufacturer in the world, Amphenol Sine Systems can custom design, engineer and manufacture cable assemblies to your exact customer specifications and produce large or small quantities, all to the highest standards, delivered on-time and in-specification.

Numerous are the demands of the market place to modify existing standard products or develop new connector technologies, along with custom logos and other appearance options at competitive pricing levels, particularly when an off-the-shelf connector cannot meet the application requirements needed.

Whether your specific needs are a custom connector or a complete turn-key cable assembly Amphenol Sine Systems proven ability to collaborate the dictates of the product design with our experience and the customer's unique requirements is an anticipated and welcomed challenge. The result, reliable cable assembly technologies, through committed and competitive people, innovation and technology all dedicated to customer satisfaction!

## Automotive Diagnostic Custom Solutions *Engineered locally. Manufactured globally.*

We are Amphenol Sine Systems.  
Standard products.  
Custom Solutions.
