

NEWS RELEASE

April 1, 2008

Amphenol Sine Systems, a subsidiary of **Amphenol Corporation (NYSE-APH)**, announces the release of its newest improvement to its existing product line.

Are you tired of troubleshooting common E19 and E20 fault messages and error codes, due to cable failure? With traditional contact system design, failure is inevitable when confronted with CONTINUOUS FREQUENCY VIBRATION, TEMPERATURE CYCLING, ENVIRONMENT FLUCTUATIONS and CORROSION. With a little forward thinking and design, **Amphenol Sine Systems** is proud to offer you a better solution: **RockSolid™ Connections**.

Amphenol Sine Systems NEW hi-reliability feedback cable assemblies have been designed specifically to be compatible with a variety of industry name brand products, such as:

- Rockwell Automation
- Rexroth
- Indramat
- Bosch
- Siemens
- Fanuc Robotics

Key Benefits:

1. Immunity to Shock and Vibration
2. Low Contact Resistance
3. Low Insertion and Extraction Forces
4. Longer Contact Life

For more information, please contact Amphenol Sine Systems at 1.800.394.7732, or go to our website at www.sineco.com.
